COURSE DESCRIPTION

Architecture, and its practice deal with complex design requirements assimilating changing processes, contexts and tools of production. There are numerous individuals and firms designing successful practices to respond to a range of objectives. Among the many values that drive a practice, some aim to bridge the gap between the hope of what design offers and the reality of what it delivers. Some practices integrate research to include and innovate. Many practices build beyond externally imposed restrictions, while others maneuver a path through collaboration, foresight, and precision of implementation. One category does not necessarily exclude the other. Many are finding ways to dilute existing systems to successfully allow for innovation, equity and experimentation. This course invites students to consider a range of themes on leading ideas through architecture. Leadership is not reduced to its definition as superiority or authoritative management, rather is embraced as creative ways to flourish and practice towards a relevant and desired objective in the field.

OBJECTIVES

- To understand a spectrum of roles and scales of leadership in architecture
- To set frames of reference for students that seek to prepare themselves for ranging shapes of practice in architecture
- To study and present firms, or individual practitioners with targeted leadership intent.
- To introduce considerations with an overview of the process of practice in architecture with focus on the considerations in new venture initiative and development.
- To introduce processes involved in idea generation, evaluation, operations.

TEACHING APPROACH

Students will be exposed to themes, precedents, and skill developments to envision a potential architectural leadership direction and possible ways to implement it through Thematic Directions, Skills Development and Applied Evaluations.

There will be lectures, panel discussions with invited guests, question and response sessions. In addition, a series of developmental assignments will be produced to progress the students' final presentations.
